NGO

MIS

NGO Processes Automation System

Non-profits and Non-Governmental Organizations (NGOs) are increasingly looking for ways to improve services provided as well as creating an impact in their society. Donors want non-profits to communicate openly and demonstrate their effectiveness, but many of these organizations often do not take advantage of the digital tools at their disposal that would help them do so. Sophisticated data collection and analysis resources are more accessible and affordable than ever, but despite the size and influence of the NGO sector, it lags other sectors in adopting modern technology.

By making the best use of technology, non-profit organizations can operate more efficiently and

cost-effectively. Technology for NGOs benefits the organization, the volunteers, the employees, and other stakeholders/donors.

One of the ways charitable organizations can effectively and strategically capitalize on technology is through investing in an ERP solution like NGOMIS.

NGOMIS is a cloud-only suite of the Dudumizi family of business systems. It allows the organizations to manage their entire end-to-end operations with a single, flexible, and powerful business application – integrating NGO accounting, fundraising, Constituent Relationship Management (CRM), Enterprise Resource Planning (ERP), project management and other functions.

Key Features:

- Monitoring & Evaluation
- All approval automation
- Accounting
- Requisition Management
- Payment Voucher Management
- Retirement Management
- Procurement (Tenders, Suppliers, Document & Warehouse)
- Multi donors capability
- Assets Management
- Expenses logs
- Payee database
- Programs, Projects & Activities Management
- Task and to do list Management
- NGO Insights Dashboard
- NGO communications
- Donors, Bank Account and Funds Management

Other Professional Services for NGO

Our Clients

Key Advantage

1

Compatible with local regulations

2

Developed from real NGO requirements

3

API ready for Integration with other systems

Why Your NGO needs NGOMIS:

- Better collaboration within teams
- Manage Deadlines & Improve Organization workflow
- Reduce Payment Approval delays
- Work Anytime from Anywhere
- Increased transparency
- Easier to onboard new staff
- Improved donor's trust
